

Eduardo Canelas Eterovic

(689) 220-9515 edu.canelas.e@gmail.com linkedin.com/in/eduardo-canelas-eterovic github.com/eduardo-canelas Orlando, FL

SUMMARY

Junior software engineer and UCF Information Technology graduate candidate with hands-on experience building React, JavaScript, Java, Node.js/Express, MongoDB, Supabase, and AI-assisted applications. Strong fit for product-focused engineering teams through full-stack feature delivery, Agile sprint planning, automated testing, CI/CD quality gates, code review, and user-facing software development.

CITIZENSHIP STATUS

Successfully passed U.S. citizenship interview and exam; oath ceremony is currently being scheduled, with Certificate of Naturalization anticipated by December 2026.

EDUCATION

University of Central Florida Aug 2021 to May 2026
B.S. in Information Technology - Orlando, FL | Dean's List 2023-2024 | GPA: 3.7 | Coursework: OOP, Enterprise Computing, Operating Systems, Security in Computing, Databases

EXPERIENCE

Clozi LLC (AI Fashion Startup) Jan 2026 to Present
Founder & Technical Product Lead - Orlando, FL

- Architecting CLOZI mobile app using React Native, TypeScript, JavaScript, and Supabase
- Built secure backend/data layer with 48 Postgres tables, 166 RLS policies, and 7 storage bucket policy sets
- Added CI/CD release quality gates with 80% line/function/statement and 70% branch coverage thresholds
- Implemented automated checks for secrets, unsafe migrations, forbidden any, and E2E regression flows
- Developed generative AI outfit recommendations and wardrobe intelligence workflows

Riskier (Insurance Technology Startup) Apr 2025 to Present
Project Manager (Part-Time) - Orlando, FL

- Led Agile delivery for AI carrier-matching workflows across 45 insurance carriers
- Coordinated sprint planning, stakeholder feedback, feature prioritization, and cross-functional execution
- Reduced agent carrier research time by 40-60% through pre-qualification logic
- Improved pre-quote workflow efficiency by 25%+ through guided filtering and routing

UCF Student Union Nov 2022 to Present
Event Manager - Orlando, FL

- Led operations for an average of 2 events per day across 6+ ballrooms/venues
- Managed crews of 15+ staff members per shift while coordinating priorities under time pressure
- Maintained 100% on-time setup completion and event start readiness from Student Union operations side

PROJECTS

Packet Tracker / RoutePulse Apr 2026
React, Vite, JavaScript, Node.js, Express, MongoDB, Mongoose, Gemini API

- Built a MERN package-tracking application for admins and drivers with role-based login, protected routes, and user-facing dashboards
- Implemented REST APIs for package CRUD, driver assignment, package summaries, and AI operations briefings
- Enforced backend ownership rules so admins can manage all shipments while drivers can only view, update, and delete assigned packages
- Modeled logistics data with 5 MongoDB entities and a many-to-many package/facility relationship through `HandlingEvent`
- Built React admin and driver interfaces with search, filters, status workflows, driver rosters, shipment ledgers, metrics, and recent events
- Integrated a generative AI operations assistant that produces JSON-grounded dispatch briefings from live backend state, with local fallback logic when the Gemini API is unavailable
- Validated role access, admin CRUD, driver-scoped CRUD, duplicate-user handling, and status-update flows through manual API and demo testing

EduWealth Jan 2026
React Native, Expo, TypeScript, Supabase, Plaid, Gemini/OpenAI

- Built a student-focused fintech app with budgeting, goals, transactions, and AI advisor workflows
- Designed a 13-table schema with 48 RLS policies and audit-event tracking

Java Enterprise Coursework 2024 to 2026
Java, OOP, event-driven design, file I/O, exception handling

- Built college-management and e-store transaction applications with modular business logic, validation, persistent file handling, and report generation
- Applied object-oriented design, sorting/searching, and event-driven transaction processing in coursework projects

CLOZI Web Dec 2025 to Jan 2026
React, TypeScript, Vite, Supabase, React Query, Gemini

- Built full web platform for wardrobe, outfit generation, social feed, and circles workflows
- Managed 40+ database migrations for schema growth and privacy/RLS hardening

SKILLS

Languages: JavaScript, TypeScript, Java, SQL, Python

Frontend: React.js, React Native, Vite, Expo, Tailwind CSS, React Router

Backend & Data: Node.js, Express, MongoDB, Mongoose, Supabase, Postgres, REST APIs

Testing & Delivery: Automated testing, unit/integration/E2E regression testing, CI/CD, continuous delivery, release quality gates, code review

AI & Data: Generative AI tools, Claude, Codex, Gemini/OpenAI integration, prompt design, AI-assisted development, confidence scoring, data modeling

Agile & Tools: Agile/Scrum, sprint planning, Jira-style issue tracking, stakeholder communication, Git, GitHub, GitHub Projects, Playwright, Firebase, Figma

ACTIVITIES & HONORS

AI@UCF | HACK@UCF | National Society of Collegiate Scholars | Dean's List 2023-2024
